

## **Build with CaRe - mainstreaming energy efficient buildings**

### **Descripción:**

Build with CaRe is a partnership involving five countries with the ambition of mainstreaming low carbon and energy-efficient building design and construction.

This conference will identify the key barriers to mainstreaming energy efficient buildings whilst highlighting the need for strong leadership and demanding energy efficiency targets.

The Energy 2020 Strategy states that “Energy efficiency is the most cost effective way to reduce emissions”. This conference will also highlight the benefits that energy efficient buildings can bring to the European community.

This conference will include presentations from Andrew Duff MEP & Build with CaRe Ambassador and Jean-didier Hache, CPMR with further speakers to be confirmed
